

Totally Focused. Totally Independent.

Vicenza, the 8th of April 2020

Dear Valuable Customer, Dear Valuable supplier, Dear Partners,

In this hard days, our industry is called out by unprecedented challenges. Generators, alternators, and the component necessary to produce gen set, have been considered strategical industries in almost any country. Every nation that had to stop industrial activity to cope with the Covid19 emergency, has allowed in spite of common interest to stay open and active, involving the full supply chain.

Without Gen Sets, it is not possible to power supply the tent hospital which are growing everywhere. Without gen sets, it is not possible to power up refrigerated trucks delivering medicines. Without emergency gen sets, people life would be endangered to an unprecedented level.

In Mecc Alte we fully accept the challenge to keep production and deliveries active, and we raise the bet: the full support of the supply chain is not just about orders, products delivery and subcontractors engaged. Is also about the financial stability of the whole supply chain, which is certainly put to the test nowadays. Mecc Alte group is committed to the respect of the payment condition to every supplier, with a special attention to those which are totally connected to our production and less financially structured.

For this reason, we equally request the support to our customers in respecting the payment conditions, to allow the whole supply chain to properly work. We know it's a challenge for everyone, but we are sure to share the same ethical vision of our activities.

Once again, we thank you for all your support,

Just, Thank you

We, Mecc Alte.
