

THE LIGHTING ONE.

- ✓ LT3 Alternator
- ✓ GC250 Controller
- ✓ Battery Charger

All the kit you need.
All in one place. All in one box.

Bring light relief to your next project with consistent, reliable power. Engineered around Mecc Alte's specialised LT3 range alternators, the Lighting ONE power component kit delivers stable performance for fixed-speed lighting tower applications wherever you need portable light.

With The Lighting ONE, simplify operations and reduce inventory costs. The dual-frequency capability (50/60Hz) means one machine fits all your needs, eliminating the need for application and region-specific equipment.

The LT3-DF alternator features high-performance diodes and capacitor specifically designed to handle the demanding on/off switching cycles and ballast requirements. Paired here with the cost-effective GC250 controller, the system provides straightforward operation without unnecessary complexity, ensuring your lighting towers perform reliably when and where you need them. The Lighting ONE component kit is completed with a dependable 12V 6A battery charger.
